KON**DRAIN®**

Condensate Drains

Fully automatic condensate drainage from compressed air and gas systems without loss of compressed air

Premium cost effectivenesse

Compressed air generation is as necessary as it is cost intensive. **KONDRAIN®** in a level-controlled, electronic version offers the most effective solution in order to make the most cost effective use possible:

- The intelligent level regulation ensures no unnecessary air loss and therefore no energy loss.
- Condensate is only removed safely and securely when it has accumulated in the drain.

This makes the best cost effectiveness for the compressed air system possible at the best price/performance ratio. As a result KSI **KONDRAIN®** condensate drains contribute globally to significantly increasing the efficiency of production sites.

Premium reliability

The **KONDRAIN®** series offers the highest level regulated, fully automated reliability. This helps to avoid condensate breaches and contamination in the compressed air system. At the same time **KONDRAIN®** reliably protects compressed air-

The KONDRAIN® Plus-Effects +++

- + no unnecessary compressed air loss saves operating
- + proven technology, suitable for every condensate type
- maximizes operational reliability by protecting installations, processes and products
- assures demand-appropriate compressed air quality
- + robust quality, long service life
- + intelligent control, fully automatic monitoring
- + immune to dirt because of integrated sieve filter
- + very service-friendly
- + excellent price/performance ratio

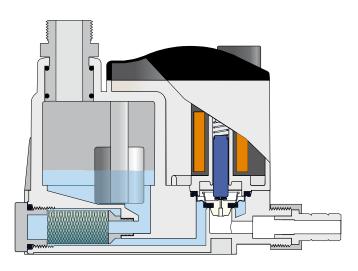

driven installations, control systems, production processes and, ultimately, product quality. The KSI series features an extreme performance spectrum and is therefore capable of reliably discharging condensate types ranging in consistency from 100% oil to 100% water. This provides the highest degree of safety for your compressed air system.

KONDRAIN® N

Level-regulated electronic condensate drain

KONDRAIN® N is a high-performance condensate drain that measures the condensate level internally and discharges it using level control, resulting completely without compressed air loss, at maximum condensate volume. The level regulation is reliably assured via the industrial reed contact and float technology that has proven itself millions of times all over the world. This means that a contact float unit that is process-conforming specifically for condensate technology triggers the opening of the release valve when the maximum level is reached for the exact duration until the drain minimum level is reached, allowing the valve to close again.

Performance features:

- flexible connection, a 90° rotatable connection facilitates flexible installation
- highly durable Viton membrane
 - ▶ more reliability and long service life
- maximum protection for membrane and function through integrated filter
- functional test is possible at any time via a test button,
 which can also be used for manual emptying
- self monitoring using intelligent control
- · operational protection through auto reset function
- status message in the case of alarm (except model N1)
- zero-voltage contact (except model N1)
- voltage display (except model N1)
- consistent performance level for condensate ranging from 100% oil to 100% water
- just one service kit for the entire series
- ecologically & economically reasonable

KONDRAIN® KMT

Time-controlled condensate drain with free with freely selectable interval

Features:

- simplest operation
- most compact dimension
- interval time can be optimized at any time
- opening interval can be seen at a glance
- manual emptying possible at any time via test switch
- highest functional safety
- available as KONDRAIN® KMT-HP for pressures of 50,
 250, 350 and 500 bar

KONDRAIN® N

Level-controlled Condensate Drains

Specification Modell	N1	N ₅	N10	N30	N160	N300
Capacity: compressor	10 m³/min	7,5 m³/min	15 m³/min	30 m³/min	158 m³/min	300 m³/min
Capacity: dryer	20 m³/min	15 m³/min	30 m³/min	60 m³/min	316 m³/min	600 m³/min
Capacity: filter	100 m³/min	75 m³/min	150 m³/min	300 m³/min	1580 m³/min	3000 m³/min
Potential-free alarm output	no	yes	yes	yes	yes	yes
Operating pressure			0,2 to 16 bar			
Operating Temperature	1 to 60°C					
Available types of voltage	24 V ac (24 V dc on request)					
	115 V 50/60 Hz					
	230 V 50/60 Hz					
Safety class	IP 65
